DIGEST

U.S. Agricultural Exports \$7.5 Billion Higher in FY 1988 (see p. 2). U.S. agricultural exports continued growing in fiscal year (FY) 1988 (October 1987–September 1988), gaining \$7.5 billion and 19 million tons, despite a severe U.S. drought and an upturn in the U.S. dollar's foreign exchange value. Soybeans remained the largest agricultural export for the third consecutive year, growing \$800 million to \$5 billion. Wheat exports increased more than any other commodity, growing \$1.6 billion, and surpassed corn to become the second-highest valued export. FY 1988 exports of high-value products reached a record \$16.4 billion, boosted by record exports of animal products and horticultural products.

U.S. Agricultural Imports Climb to a Record \$21 Billion in FY 1988 (see p. 8). U.S. agricultural imports rose to \$21 billion in FY 1988, exceeding both the previous record of \$20.9 billion in FY 1986 and last year's imports of \$20.6 billion. Gains in competitive products offset the \$600-million drop in coffee imports. Price increases explain nearly all of the higher import value. Key issues remain unresolved following meetings of the International Coffee Organization (ICO) and International Cocoa Organization (ICCO) talks in September.

U.S. Agricultural Exports to Iraq Rising Rapidly (see p. 13). U.S. agricultural exports to Iraq are expected to reach a record \$900 million in 1988, up sharply from \$528 million in 1987. Rising food demand, increased credit availability, and an improved food distribution system have contributed to the strong gain. Most of the \$1.04 billion of U.S. Commodity Credit Corporation credit guarantees made available in FY 1988 have already been used.

Appendix Tables (see p. A-1). Tables cover quantities and values for U.S. agricultural exports and imports by commodity and country for October–September 1986/87 and 1987/88 and commodity prices for October–September 1987/88.

Prepared by the Commodity and Trade Analysis Branch, Commodity Economics Division, Economic Research Service, U.S. Department of Agriculture. Principal coordinators were Thomas A. Warden and Mary L. Fant. Trina J. Duffin provided word processing and table formatting support. Editorial support was provided by Teri L. Davis, Research Information Branch, Information Division, Economics Management Staff. Data processing support was provided by Sharlan Starr and William Meiller, International Economics System Branch, Data Services Center.

U.S. AGRICULTURAL EXPORTS \$7.5 BILLION HIGHER IN FY 1988

U.S. agricultural exports continued growing in fiscal year (FY) 1988 (October 1987–September 1988), gaining \$7.5 billion and 19 million tons, despite a severe U.S. drought and an upturn in the U.S. dollar's foreign exchange value. Soybeans remained the largest agricultural export for the third consecutive year, growing \$800 million to \$5 billion. Wheat exports increased more than any other commodity, growing \$1.6 billion, and surpassed corn to become the second-highest valued export. FY 1988 exports of high-value products reached a record \$16.4 billion, boosted by record exports of animal products and horticultural products.

Bulk Products' Prices Higher

Higher prices boosted soybean export value in FY 1988. Export volume fell as larger Southern Hemisphere supplies and higher U.S. prices trimmed sales late in the year. Export volume fell slightly from FY 1987's 21.4 million tons, slipping to 20.9 million tons.

Despite lower volume, soybean export value rose 19 percent as the FY 1988 average export price reached \$240 per ton compared with \$197 per ton in FY 1987. Smaller U.S. supplies following the drought accounted for some of this increase, but even before the drought, the prospect of falling stocks and strong consumption had induced global price gains. Higher prices helped reduce export volume to most major customers in FY 1988, as exports to the EC fell 670,000 tons, those to Japan fell 340,000 tons, and those to Korea and Taiwan together fell 220,000 tons. However, exports to Indonesia in FY 1988 rose 260,000 tons, while those to the U.S.S.R. rose 760,000 tons. Soybean meal consumption in the U.S.S.R. nearly quadrupled between 1985 and 1987, and the FY 1988 level of Soviet purchases of U.S. soybeans was one of the highest ever.

Higher prices also boosted export value for soybean meal in FY 1988. The volume of soybean meal exports fell 410,000 tons, but value rose 11 percent to \$1.5 billion. FY 1988 exports to the EC fell 1.7 million tons from the FY 1987 level, as U.S. exports absorbed virtually all of a reduction in EC consumption and imports. However, much of this drop was offset by a record-high 1.3 million tons shipped to the U.S.S.R.

U.S. Programs Boost Wheat Exports

wheat export value rose 55 percent to \$4.5 billion as both prices and volume grew. Export volume rose 12 million tons as exports to the U.S.S.R. more than doubled to a record 9 million tons, and exports to China rose 5 million tons. Exports were also higher to Latin America, Eastern Europe, India, and North Africa.

Few customers purchase U.S. wheat without using some U.S. Government export promotion program. Virtually all customers mentioned above purchased wheat under the Export Enhancement Program (EEP) in FY 1988, and the EEP was involved in nearly 70 percent of U.S. wheat sales. The EC, Japan, Korea, and Taiwan are practically the only customers not benefiting from the EEP, food aid assistance, credit guarantees, or other U.S. Government assistance. These customers paid \$134 per ton for U.S. wheat in 1988. In contrast, the average for the remaining U.S. customers, who accounted for 83 percent of U.S. wheat

exports in FY 1988, was \$106 per ton. While some of this difference in price represents differences in wheat type, class, and quality, much of the \$28 difference represents a subsidy. For example, the bonuses paid to enable U.S. exporters to make sales to the Soviet Union averaged \$32 per ton in FY 1988, while bonuses for sales to China averaged \$42 per ton.

The combined price of U.S. wheat exports averaged \$110 per ton in FY 1988, \$8 higher than the combined price in FY 1987. However, U.S. corn exports rose \$20 per ton, nearly equal the amount that both corn and wheat prices gained on U.S. markets. However, since corn is exported with virtually no involvement in U.S. export programs, changing export prices more fully reflected changes in market prices.

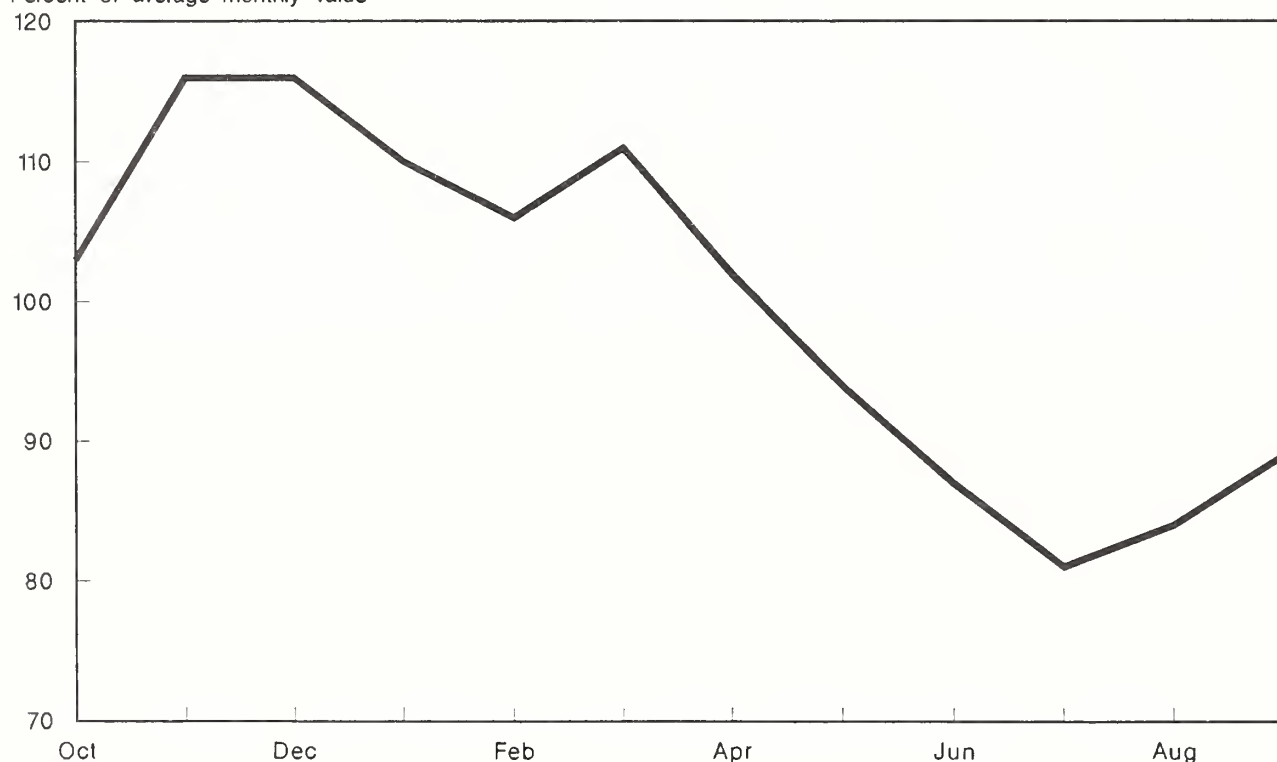

In FY 1988, U.S. corn exports rose to 44 million tons from 39 million tons in FY 1987. Value rose from \$3 billion in FY 1987 to \$4.3 billion in FY 1988. Growth markets included Japan, the U.S.S.R., Eastern Europe, the EC, the Middle East, Korea, and Taiwan. Exports were lower to China, Brazil, and Egypt. World corn trade fell in FY 1988, but U.S. exports rose as exportable supplies fell in competing countries.

The United States suffered one of its worst droughts on record in 1988, when production of wheat, corn, and soybeans fell as much as 34 percent. In addition, water levels on important barge routes fell dramatically, slowing transportation of grains and oilseeds and increasing transportation costs. FY 1988 exports were only slightly affected because of the drought's timing. U.S. agricultural exports are highest during the winter and early spring (fig. 1). These exports primarily consist of crops harvested the preceding fall. By

Figure 1

Seasonal export pattern¹

Percent of average monthly value

^{1/} Based on FY 1982 through FY 1987 data.

June 1988, 75 percent of FY 1988's corn exports had already been shipped, as had 87 percent of soybean exports, and 77 percent of wheat exports. The effect of reduced U.S. crop production and higher prices, therefore, will fall largely on FY 1989 exports.

Broad-Based Growth in High-Value Exports

High-value exports grew \$2.0 billion in FY 1988, reaching \$16.4 billion and surpassing the previous record high of \$14.1 billion. Either export value or volume reached record highs for grapefruit, tree nuts, raisins, feeds and fodders, whole cattle hides, beef, poultry meats, edible offals, frozen vegetables, fruit juices, essential oils, and seeds. FY 1988 apple and canned vegetable exports were near record levels. In contrast, bulk exports remained \$11 billion below their record high. Record highs for both bulk and high-value exports were previously set in FY 1981.

One source of strength for high-value exports has been sales to developed countries, where consumers can afford a greater variety of foods and more processed foods. Since 1981, economic growth and currency appreciation has been strongest in developed countries, where real economic activity was 21 percent higher in 1988, and real exchange rates were as much as 35 percent higher. In contrast, developing countries grew only 15 percent between 1981 and 1988, and their currencies declined.

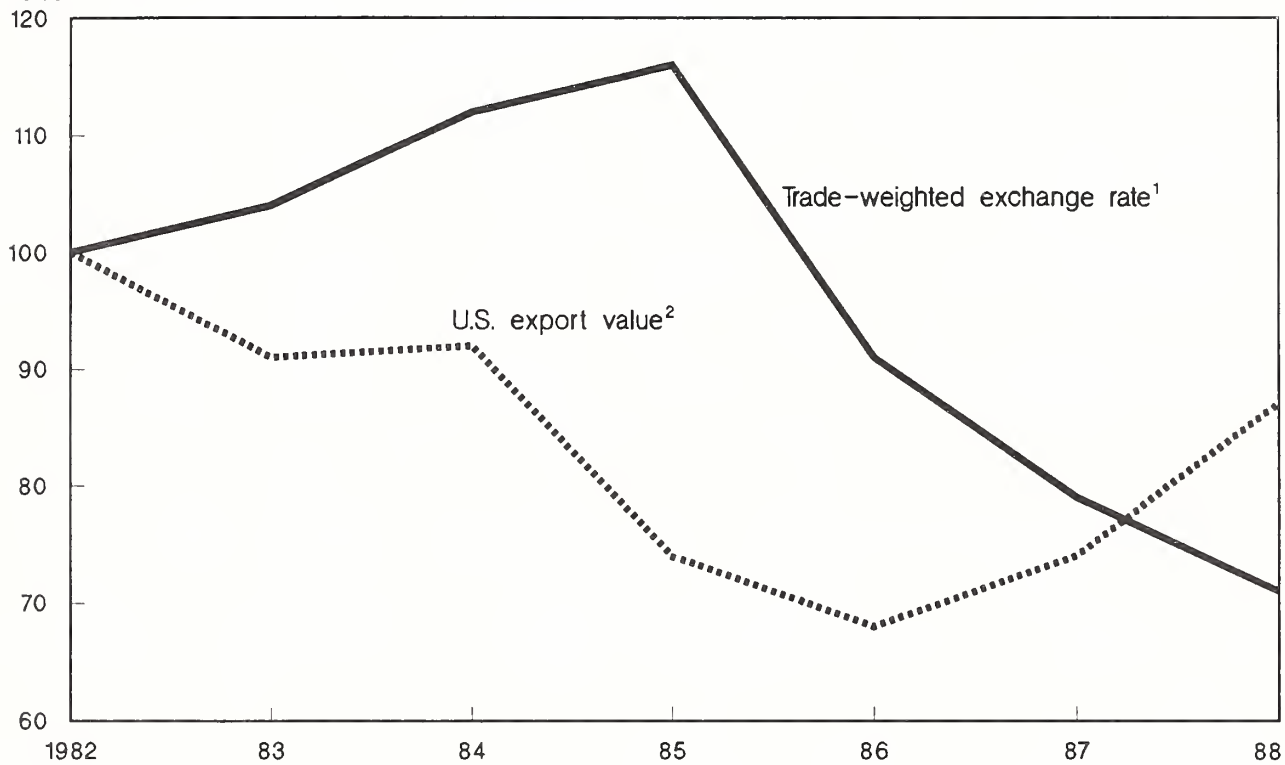

The presence of three exceptions to generally lackluster economic performance in developing countries has also boosted U.S. high-value exports. Taiwan, South Korea, and Hong Kong have consistently been among the world's fastest growing economies during the 1980's, and U.S. high-value exports there have grown 117 percent since 1982. Although the largest increase in export demand occurred in Japan, U.S. high-value exports would probably have remained below record levels if sales to Other East Asia had remained low.

During spring and summer 1988, currencies of the developed countries began weakening, reversing a 3-year trend that was instrumental in boosting U.S. exports. However, FY 1988 exports were only slightly affected because of the lag between changes in currencies and changes in exports. This lag is typically at least 1 year (fig. 2). Furthermore, Japan, the source of 50 percent of the growth in U.S. high-value exports since 1985, saw its currency weaken only 6 percent, in contrast with a 50-percent gain during the previous 3 years. This slight decline between spring and fall 1988 still left the yen stronger than during summer 1987 and assured that the yen was still stronger on average for 1988. (Stephen MacDonald, Commodity and Trade Analysis Branch)

1/ Revised.

U.S AGRICULTURAL IMPORTS CLIMB TO A RECORD \$21 BILLION IN FY 1988

U.S. agricultural imports reached a record \$21 billion in fiscal year (FY) 1988 (October 1987–September 1988), exceeding both the previous high of \$20.9 billion in FY 1986 and last year's imports of \$20.6 billion. Gains in competitive imports for the fifth consecutive year offset the \$600-million drop in coffee imports. Price increases explain nearly all of the higher import value. Table 4 lists price changes for the major commodities.

Table 4--Import price changes in FY 1988, selected commodities

Commodity	Import value	Price increase	Commodity	Import value	Price decrease
	<u>Million dollars</u>	<u>Percent</u>		<u>Million dollars</u>	<u>Percent</u>
Wool, dutiable	245	60	Coffee	2,600	-8
Orange juice	523	53	Cashew nuts	219	-11
Casein	296	46	Pork	1,001	-10
Vegetable oils	725	30	Cocoa	1,164	-4
Live cattle	599	30			
Rubber	949	29			
Wine	976	15	Total	4,984	-8
Tomatoes	164	10			
Beef and veal	1,681	7			
Malt beverages	940	5			
Sugar	368	3			
Bananas	820	3			
Total	8,286	19			

Substantial price increases produced relatively small adjustments to import quantities for the first six commodities listed: dutiable wool (no change), orange juice (minus 21 percent), casein (minus 12 percent), vegetable oils (plus 13 percent), rubber (plus 3 percent), and live cattle (no change). Where prices fell, the quantity change was greater than the price adjustment for coffee and cocoa. Comparatively small quantity adjustments indicate a general unresponsiveness of imports to price changes.

Competitive versus Noncompetitive Imports

Competitive imports were at record highs in every quarter of FY 1988. In contrast, noncompetitive imports only exceeded the previous year's total in the last quarter, when coffee imports returned to normal levels. April-June 1988 coffee imports of 189,000 tons is the lowest on record. Coffee bean imports during FY 1988 were at their lowest level in 12 years, reflecting the lowest prices since the 1976 frost in Brazil sent prices up 117 percent in 1 year.

Table 5--Coffee bean imports, FY 1985-88

Year	Quantity	Price
	1,000 tons	Dollars per ton
1985	1,091	2,794
1986	1,185	3,503
1987	1,171	2,585
1988	1,006	2,398

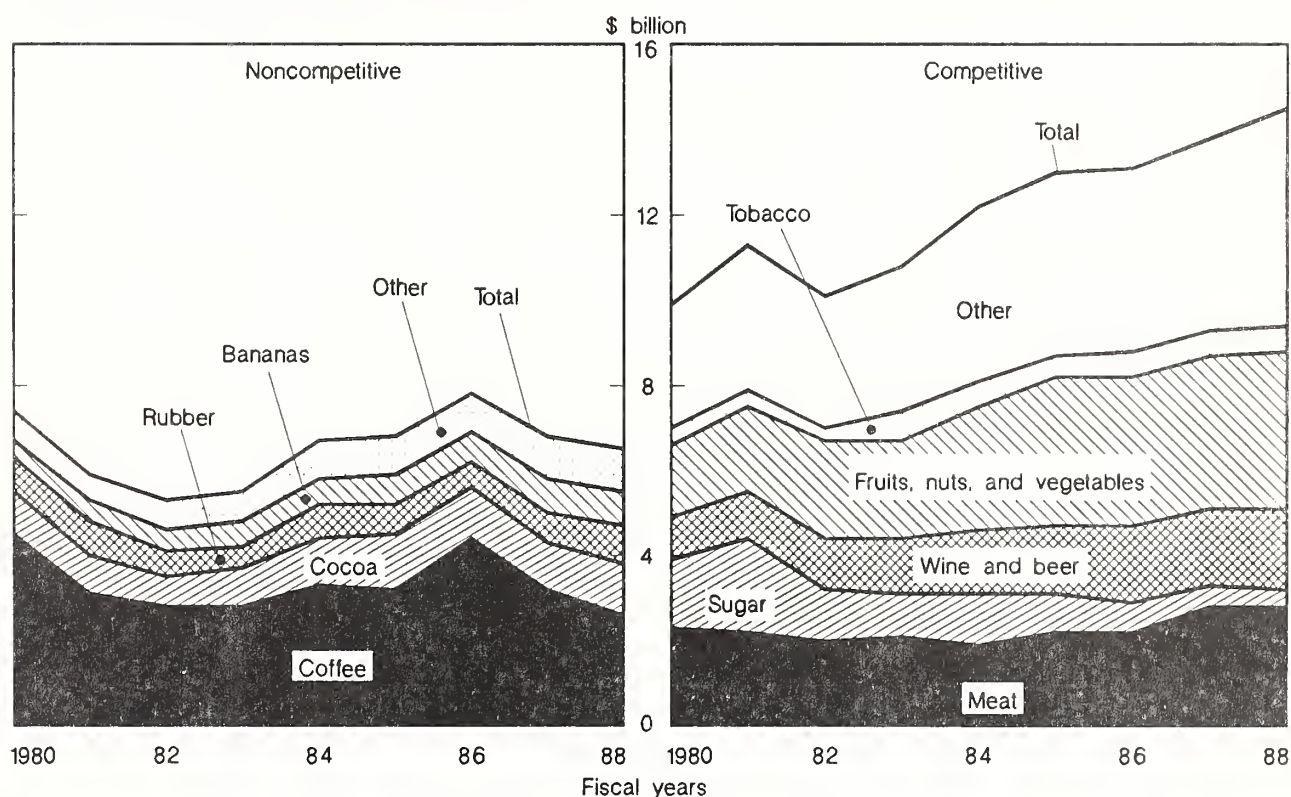

Competitive imports cover a wider range of commodities than do noncompetitive imports. This is shown in figure 3 by the size of the "other" category. The range of U.S. climate, terrain, and soils prohibits the production of only a few commodities. While coffee, cocoa, rubber, and bananas made up 85 percent of noncompetitive imports in FY 1988, meat, sugar, wine and beer, and fruits, nuts, and vegetables made up only 63 percent of competitive imports.

Issues Unresolved at ICO and ICCO Talks

The International Coffee Organization (ICO) and the International Cocoa Organization (ICCO) adjourned their annual meetings in September without resolving key issues. Differences between coffee producers and consumers

Figure 3

U.S. agricultural imports by commodity

Noncompetitive imports include coffee, cocoa, rubber, and bananas. Competitive imports include meat, sugar, live animals, fruits, nuts, vegetables, wine, tobacco, and sugar.

narrowed at the ICO talks, even as consumer nations led by West Germany said that they would vote not to extend the agreement scheduled to expire in September 1989.

The split occurred over separate quotas for arabica and robusta coffee. Producer countries wanted to maintain current quotas, while consumer countries wanted new quotas to reflect the quality differences between arabica and the lower quality robusta coffee. To accommodate consumer countries, the ICO amended the existing rules to allow changes in quotas based on the price differential between arabica and robusta coffees. The ICO set the FY 1989 global export quota at 58 million bags in September and immediately implemented a 2-million-bag cut effective in early October (1 bag equals 132.3 pounds). The ICO left unresolved the overall issue of individual quotas until next year.

The ICCO remains unable to stabilize the cocoa market through purchasing cocoa. Cocoa stocks withheld thus far are insufficient to stabilize cocoa prices, and the stock-purchasing authority cannot purchase additional cocoa. In addition, the Ivory Coast, the largest cocoa producer, has indicated that it will not join the new pact when the International Cocoa Agreement (ICCA) expires in September 1990. World cocoa production is forecast to increase in crop year 1988/89 to 2.3 million tons, a fourth consecutive record.

In 1986, the ICCO set the support price for cocoa beans traded on the world market at 1,485 Special Drawing Rights (SDR's) as a lower limit (1 SDR=\$1.30). ^{1/} Nevertheless, the price in late October had fallen to 1,000 SDR's.

Import Quotas, 1985 Farm Act Boost U.S. Sugar Production

U.S. production of cane and beet sugar expanded to a record level in FY 1988 due to more restrictive import quotas imposed in 1982 and provisions in the Food Security Act of 1985. While import quotas alone generally raise domestic production, the provisions of the 1985 Food Security Act required a high enough market price to avoid forfeiture of price-support loans. Farmers responded to the higher price by producing more sugar. A third incentive was lower returns to competing crops such as grains and oilseeds. In the 6 fiscal years before the quota, production averaged 5.9 million short tons annually. This includes FY 1980 when average world prices rose to 29 cents per pound. From FY 1983 through FY 1985, production averaged 5.9 million tons--similar to the period before the quota--and then soared to a record 7.3 million tons by 1987/88.

Figure 4 illustrates the manner in which the quota influences U.S. sugar output. The quota restricts the amount of sugar available in the U.S. market, thereby forcing up the domestic sugar price. Producers respond to the higher price by producing more sugar. Since the United States restricts the amount of sugar imported, more sugar is available on the world market and world prices fall. (Stephen R. Milmo, Commodity Trade and Analysis Branch)

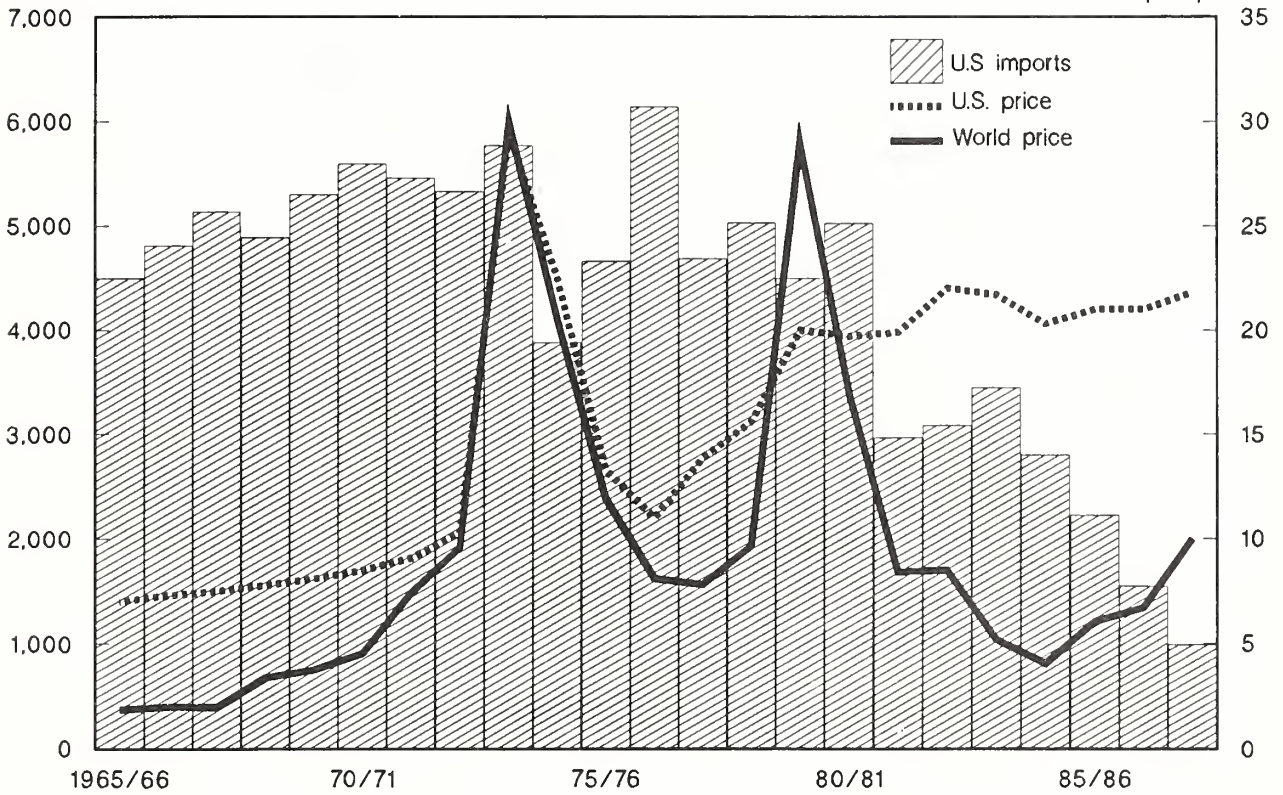

^{1/} Special Drawing Rights are a market basket of member countries' currencies computed by the International Monetary Fund. Since January 1, 1986, the SDR valuation basket consists of the five member countries having the largest exports of goods and services during 1980-84.

U.S. AGRICULTURAL EXPORTS TO IRAQ RISING RAPIDLY

U.S. agricultural exports to Iraq are projected to reach a record \$900 million in 1988, up sharply from \$528 million in 1987. Increased credit availability, rapid food demand growth, an improved domestic distribution system, and port access and financial problems faced by other suppliers have contributed to the strong U.S. gain.

Nearly full use of the \$1.04 billion available through Commodity Credit Corporation (CCC) programs has significantly increased U.S. agricultural exports to Iraq. Exports through CCC programs, primarily GSM-102 and GSM-103 credits, involve more than 20 commodities compared with only 5 commodities when GSM-102 credit (U.S. Treasury guarantees for commercial credit repayable in 3 years) was instituted in December 1983. In 1986, when GSM-103 credits (guarantees for commercial credit repayable in up to 7 years) were introduced, Iraq became a major client.

Iraq's agricultural imports increased markedly in 1987 and 1988 and further gains are anticipated. Iraq's agricultural import value may increase one-fifth to \$3 billion in 1988 because of greater purchases from the United States, the European Community (EC), and Turkey, combined with the upswing in world prices. Ambitious Iraqi development plans to bolster industry and agriculture are increasing demand for imported raw materials and animal feed. Imports of cereals, vegetable oils, sugar, and industrial crops are rising as state importing agencies make greater efforts to ease domestic shortages.

Changes in Iraq's economic policy, especially the recent privatization of certain aspects of food marketing and processing, have created additional marketing opportunities. Plans to greatly increase petroleum exports have also spurred Iraq's willingness to make more purchases on credit, including U.S. agricultural export credits. Other export programs, including the U.S. Export Enhancement Program (EEP) and the export restitution payments provided by the EC, have contributed to lower average prices for Iraq's agricultural imports.

Iraq is an Expanding Market for U.S. Farm Products

Major U.S. agricultural exports to Iraq have surged in 1988, when they began including commodities not previously shipped to Iraq. The following are key factors contributing to this growth and diversification:

1. Iraq's average population growth of 3 percent annually, coupled with efforts to improve diets, has boosted demand for imported foods. Food import demand was first stimulated in the early 1970's, when petroleum export revenue rose sharply. Iraq's urbanization, improved marketing systems, and the extension of food subsidy and distribution programs out of major cities into rural areas have also helped fuel consumer demand.
2. Iraq's agricultural production continues to grow slower than its demand. Per capita food production remains below the level of a decade ago, although favorable weather has allowed a rebound in wheat and barley output in 1988.

3. Iraq's policy of seeking to diversify its sources of supply and to more carefully consider commodity pricing, as opposed to other factors, has contributed to greater Iraqi purchases from the United States.

4. Increased U.S. competitiveness has reduced Iraqi agricultural imports from the EC, Brazil, and Turkey. The combination of credit availability, the lower valued dollar, and opportunities for Iraq's public sector purchasers to quickly buy large volumes of needed commodities in the U.S. market has boosted the U.S. market share. Financial problems of Turkish exporters have disrupted Iraqi imports from Turkey. The steep drop in petroleum prices in 1986 caused Iraqi payments to Turkey to fall in arrears by more than \$2 billion, forcing many Turkish exporters to cope with delayed payments and substantial exchange-rate losses. Turkey's agricultural exports to Iraq decreased from \$346 million in 1984 to less than \$149 million in 1986, with U.S. products filling much of the gap.

5. U.S. credit availability has appealed to Iraqi financial planners because of a current foreign exchange shortage, coupled with the outlook for a large increase in petroleum exports that stems from extra pipeline capacity and the expected reopening of Gulf ports. Price subsidies provided under the EEP also have lowered the cost of importing U.S. wheat, wheat flour, frozen poultry, eggs, and dairy cattle. As a result of the EEP, U.S. sales to Iraq through the GSM-102 and GSM-103 programs increased sharply in 1987 and again in 1988, when virtually all of the available credit was used. By contrast, Iraq used only about half of the U.S. credit available during 1984-86 before the United States made initiatives under the EEP.

Trade Performance by Commodity

U.S. exports of wheat, feed grains, and soybean meal to Iraq increased again in 1988. Iraq is expected to remain the top U.S. rice market in 1988, despite increased competition from Thailand and Australia. Other highlights of U.S. agricultural trade performance in Iraq are described below.

Wheat Exports Up, Flour Exports Down

U.S. wheat exports to Iraq may increase slightly to about 1 million tons in 1988, using all of the \$135 million available through GSM-102 credit. The average Iraqi cost of U.S. wheat declined from \$122 per ton in 1986 to \$93 in 1987 but rose to \$102 during the first half of 1988, partly because of the EEP. Iraq is one of the top four markets for U.S. hard red winter wheat. Iraq's total wheat imports are expected to remain steady at about 2.8 million tons in 1988. Australia is expected to maintain a slightly higher market share than the United States, while Canada remains the third largest supplier with sales of about 600,000 tons.

Iraq's wheat flour imports are expected to decline sharply from the 1987 level of 230,000 tons. The EEP had bolstered U.S. wheat flour exports in 1987, when shipments rose moderately to 130,000 tons as the average price fell \$14 to \$135 per ton. The United States replaced Greece, Turkey, and Kuwait to become the leading Iraqi wheat flour supplier in 1987.

Iraq Remains the Top Export Market for U.S. Rice

U.S. rice exports to Iraq reached 508,000 tons in 1987, up 36 percent from those in 1986, while the average rice price dropped from \$274 per ton to \$233 per ton. As U.S. and Thai rice prices rebounded sharply in early 1988 because of drought-induced Thai shortages, it became apparent that the original 1988 GSM-102 allocation for rice of \$110 million was insufficient to cover Iraq's needs. The GSM-102 credit allocation was therefore increased to \$266 million in September 1988, after Iraq purchased about 130,000 tons of rice from other suppliers, including Thailand, Uruguay, and Australia. U.S. rice exports to Iraq are forecast to drop slightly in 1988, but Iraq will remain the top U.S. rice market.

Feed Grain and Soybean Meal Exports Rising

Iraqi feed grain imports in 1988 may exceed the 1984 record of 934,000 tons, as public trading firms seek to provide more feed for poultry projects. Feed grain imports consist primarily of corn but also include barley. The United States is the dominant Iraqi supplier of corn and a major Iraqi supplier of barley.

In 1987, U.S. corn exports to Iraq nearly doubled to 484,000 tons, valued at \$41 million, and are expected to increase in 1988. Corn prices are rebounding from the \$84 average in 1987 to about \$115 in 1988, leading to a larger allocation of GSM-102 credit. U.S. corn exports to Iraq could reach \$111 million in 1988 if the available GSM-102 credit is used. All of the 250,000 tons of U.S. barley available to Iraq under the EEP during 1987-88 has been purchased, with 66,000 tons shipped in 1987 and the remainder in 1988.

U.S. soybean meal exports to Iraq could top 300,000 tons in 1988 and could use most of the \$65 million in GSM credit available for soybean meal. Changes in procurement personnel at the Iraq Animal Feeds Company (a public agency) and smaller purchases of mixed poultry feed from Turkey have boosted market opportunities for U.S. soybean meal. The availability of \$91 million in GSM-102 credits will also contribute to larger U.S. sales of mixed animal feed to Iraq in 1988.

Expanding Market for U.S. Dry Peas and Beans

Demand for pulses greatly exceeds domestic supplies, with imports of about 84,000 tons in 1987 accounting for a third of total supply. Iraq's pulse imports from Turkey exceeded 60,000 tons annually during 1985-87, but U.S. pulse exports to Iraq increased 80 percent to 21,498 tons during the first 7 months of 1988. Great Northern beans and yellow peas have accounted for most of the shipments so far. Substantial amounts of U.S. dry beans and lentils have previously been exported to Iraq.

Iraq's Vegetable Oil and Tallow Imports Are Rising

Iraq's vegetable oil imports usually consist primarily of about 200,000 tons of palm oil from Malaysia and Singapore. However, problems with shipments through Gulf ports because of the Iran-Iraq war have caused a shift to suppliers that ship more competitively through ports in Turkey and Jordan. U.S. sunflower oil exports to Iraq increased 25 percent to 33,500 tons, valued at \$13.6 million, in 1987. Shipments in 1988 are expected to remain near that level, with the use of \$26 million in GSM-102 credits allocated to vegetable

oils. U.S. tallow exports to Iraq doubled to 17,000 tons in the first 7 months of 1988. Rapid expansion of soap manufacturing and financial problems faced by Turkish suppliers contributed to Iraq's recent hike in purchases from the United States. The EC and Turkey were Iraq's major tallow suppliers during 1981-87.

Import Substitution Programs Clip Sales of Poultry and Eggs

The striking increases in imports of feed grains, soybean meal, and feed mixtures, feed subsidies, and higher producer prices led to a more than 33-percent increase in Iraqi poultry meat production in 1988. This caused U.S. poultry and egg imports to dwindle through the summer of 1988, following unusually large Iraqi poultry and egg imports in 1987 and early 1988. Iraq purchased 60,000 tons of U.S. frozen chicken in 1987, as an initiative under the EEP and reduced Brazilian supplies allowed the United States to enter a market dominated by Brazil during 1982-86. Iraq has still not purchased the 30,000 tons of U.S. poultry available through the EEP for 1988.

Iraqi purchases of U.S. eggs through the EEP reached \$17 million in fiscal year (FY) 1988. Turkey has been the leading supplier in recent years, but its sales have fallen sharply. While Turkey has the competitive advantage of a nearby location, which allows convenient truck delivery for eggs, Iraq's foreign exchange constraints have placed higher priority on boosting domestic output based on U.S. feed imports.

Cotton and Wool Shipments Up

Iraqi textile output has recently expanded and cotton imports have increased. The United States first exported cotton to Iraq in 1987, when shipments were valued at \$12 million using GSM-103 financing. Demand continues to expand rapidly, with Iraq purchasing \$60 million of U.S. cotton in FY 1988. Turkey has been the major cotton supplier in recent years, with Iraq also importing large amounts of finished textiles from Asian countries.

A new market for U.S. wool, valued at more than \$3 million, opened in Iraq in 1987. Most of the 1988 GSM-102 credit of \$7 million for wool has already been used. Iraqi production has remained at about 11,000 tons annually, but demand has been increasing rapidly. As a result, Iraqi wool imports increased from \$2 million in 1982 to about triple that value in 1987 and came mostly from Turkey, Australia, New Zealand, and the EC.

Live Cattle Exports Up

As in the case of poultry, Iraq is planning to substitute for dairy product imports by expanding domestic production. Gains in production will be slower for dairy products, however, than were gains in production of poultry. As part of this program, the United States shipped 6,000 head of dairy cattle, valued at \$8 million, to Iraq in 1987, with most of the deliveries occurring in early 1988. A combination of GSM-102 credit, low prices offered through the EEP, and the dairy herd buyout program contributed to the U.S. sales. Iraqi imports of live cattle from the United States and Europe have already helped Iraq increase milk production.

U.S. Exports of Dairy Products Up

Iraq has recently faced severe shortages of dairy products. While local dairies are scheduled to provide more fresh milk, imports will likely provide most of the rising demand for butter and cheese. Iraq's demand for preserved milk has also increased rapidly because of efforts to improve the diet of school children and soldiers.

Dry milk imports doubled to 50,000 tons between 1983 and 1987, with the EC providing more than 80 percent of these imports. U.S. exports of dry milk through GSM-102 credit are scheduled to triple to \$30 million in FY 1988. New Zealand and Austria were other significant suppliers of dry milk to Iraq. U.S. butter exports to Iraq rose 146 percent to 2,000 tons in FY 1987 and should remain strong in FY 1988. However, U.S. butter shipments are small compared with the 11,000-ton average Iraq received from New Zealand during 1984-87. U.S. cheese exports to Iraq reached 6,000 tons in the first 7 months of 1988, double the volume for all of 1987. The EC and Australia provided most of the 38,000 tons of cheese that Iraq imported in 1988.

Sugar Sales Scheduled To Rise

U.S. sugar exports to Iraq rose 81 percent in 1987 to 151,600 tons and were valued at \$29 million. Further gains are occurring in 1988 with the use of \$68 million in GSM-102 credit for sugar. U.S. sugar sales are benefiting from transport problems faced by other suppliers and Iraqi satisfaction with the uniform quality of American deliveries. India and Thailand, the traditional Iraqi sugar suppliers, have encountered difficulties in making deliveries through Gulf ports, thus most Iraqi sugar imports are routed through ports in Turkey and Jordan.

Tobacco Sales Scheduled To Rise

U.S. tobacco exports to Iraq in 1988 should rise sharply with the use of the GSM-103 credit of \$27 million. Iraq received 6,760 tons of U.S. tobacco, valued at \$26.7 million, in FY 1987. New brands of cigarettes containing U.S. tobacco are popular in Iraq, thus imported cigarettes are scarce. Iraq seeks to reduce foreign exchange spent for cigarette imports, mostly from the EC, which exceeded \$50 million annually during 1984-87.

Flavoring Market Boom

As the Iraqi market expands and diets improve, imports of higher valued products are rising. U.S. exports of flavorings and syrups to supply Iraq's soft drink industry reached \$9 million in FY 1987, and use of available export credit has increased in 1988. Three bottling plants, franchised from U.S. firms, are greatly increasing Iraqi soft drink output. The EC and Turkey are also major suppliers of flavorings.

New Items Expected in U.S. Exports

The diversification of U.S. agricultural exports to Iraq is expected to continue. Shelves in many grocery stores in Baghdad and Basra are seldom well-stocked with canned foods, suggesting unmet demand for more processed foods. Competitors from Turkey and the EC are already increasing sales,

especially to the hotel trade. Market development efforts and credit arrangements may be helpful in opening new markets for high-valued products in Iraq. In addition to the current growth in sales of cereals, oilseed products, and agricultural raw materials, Iraq could become a significant market for many U.S. high-valued products, such as apples, pears, dried apricots, raisins, peanuts, and frozen turkeys. (John B. Parker, Developing Economies Branch, Agriculture and Trade Analysis Division)
